

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	23 June 2026
Team ID	
Project Name	An employee requests installation of licensed software through the Service Catalog
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

The Brainstorm & Idea Prioritization process was conducted to identify, organize, and evaluate potential solutions for automating the Software Installation Request process in ServiceNow. The objective was to generate multiple ideas, assess their feasibility and business impact, and select the most effective approach for implementation.

Initially, the project team defined the problem statement using the "How Might We" approach to focus on improving the software request lifecycle. The primary goal was to simplify request submission, automate approvals, reduce manual intervention, and improve request tracking for employees and IT support teams.

A collaborative brainstorming session was then carried out, where ideas related to Service Catalog, Workflow Automation, Flow Designer, UI Policies, Notifications, Catalog Tasks, Role-Based Access Control, and Update Sets were generated. Similar ideas were grouped into categories such as request management, approval automation, fulfilment automation, user experience, and future enhancements to identify common themes and eliminate duplicate concepts.

Finally, all proposed ideas were prioritized using an Importance vs. Feasibility matrix. High-impact and easily implementable features—including Service Catalog Items, Workflow Automation, Catalog Task Creation, Email Notifications, Request Tracking, and Mandatory Field Validation—were selected as the core components of the solution. Advanced capabilities such as software deployment integration and predictive analytics were identified as future enhancements.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & Idea Prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

 **10 minutes** to prepare

 **1 hour** to collaborate

 **2-8 people** recommended

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

**A**

Team gathering

Define who should participate in the session and send an invite.

Participants

- Project Developer
- ServiceNow Administrator
- IT Support Engineer
- Software Asset Team
- End User

**B**

Set the goal

Think about the problem you'll be focusing on solving in the brainstorming session.

Goal

- Automate software installation requests.
- Reduce manual approvals.
- Create catalog tasks automatically.
- Improve request tracking.
- Enhance employee experience.

**C**

Learn how to use the facilitation tools

Use the Facilitation Superpowers to run a happy and productive session.

Tools we will use

- Service Catalog
- Workflow Editor
- Flow Designer
- UI Policies
- Catalog Tasks
- Notifications
- Update Sets
- Service Portal

**1**

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement.

**PROBLEM**

How might we

How might we automate the Software Installation Request process using ServiceNow to simplify request submission, automate approvals, assign fulfillment tasks, and provide real-time request tracking for employees?

**Key rules of brainstorming**

 Focus on user needs.	 Encourage innovative automation ideas.
 Think of simple and scalable solutions.	 Consider ServiceNow best practices.
 Prioritize automation over manual work.	 Keep the solution user-friendly.

Step-2: Brainstorm, Idea Listing and Grouping

2 Brainstorm

Write down any ideas that come to mind that address your problem statement.

🕒 10 minutes

TIP
You can select a sticky note and hit the pencil icon to edit it. Icon to start drawing!

3 Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

🕒 20 minutes

TIP
Add customizable tags to sticky notes to make it easier to find, browse, organize, and share themes within your mural.

Step-3: Idea Prioritization

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

🕒 20 minutes
