

CUSTOMER JOURNEY MAP – SOFTWARE INSTALLATION REQUEST AUTOMATION

A streamlined ServiceNow solution for faster software requests and installations

JOURNEY STAGE	CUSTOMER ACTIONS	INTERACTIONS / TOUCHPOINTS	POSITIVE MOMENTS	PAIN POINTS	OPPORTUNITIES / IMPROVEMENTS	GOALS & MOTIVATIONS
1 Need Identification	Employee realizes software is needed to complete assigned work.	Manager Daily Work Organization Policies	Understands what software is required.	Doesn't know how to request software.	Provide a centralized Service Catalog with clear instructions.	Help me obtain the required software quickly.
2 Request Submission	Opens Service Portal and fills out the Software Installation Request form.	Service Portal Catalog Item Request Form	Simple and easy form submission.	Missing required details or confusing fields.	Mandatory fields, help text, and form validation.	Help me submit my request correctly the first time.
3 Approval Process	Waits while Manager and IT Approver review the request.	Workflow Approval Tasks Email Notifications	Automatic routing to approvers.	Approval delays and lack of updates.	Automated workflow with reminders and notifications.	Help me receive approval as quickly as possible.
4 Task Fulfillment	Software Support Team receives installation task and installs the software.	SCTASK Assignment Group Software Support Team	Task is automatically assigned.	Delayed assignment or manual processing.	Automatic task creation and assignment based on workflow.	Help me receive my software without unnecessary delays.
5 Status Tracking	Employee monitors request progress.	REQ, RITM Service Portal Email Notifications	Real-time status visibility.	Unsure whether request is progressing.	Live status updates and automatic email notifications.	Help me know the current status of my request.
6 Request Completion	Employee receives confirmation after installation.	Completion Notification Service Portal	Software is successfully installed.	No confirmation after installation.	Automatic closure notification with completion details.	Help me know when my software is ready to use.
7 User Satisfaction	Employee uses the installed software for daily work.	Installed Software IT Support	Improved productivity and smooth experience.	Minor support issues if installation fails.	Faster automation, transparent workflow, and efficient IT support.	Help me complete my work efficiently with the required software.

CUSTOMER PERSONA

Employee
(Software Requester)

GOAL

Obtain approved software quickly through an automated and transparent request process with minimal manual effort.

CHANNELS USED
