

Project Design Phase
Problem – Solution Fit Template

Date	25 June 2026
Team ID	
Project Name	An employee requests installation of licensed software through the Service Catalog
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Software Installation Request Automation project focuses on understanding the challenges faced by employees when requesting software and providing an automated ServiceNow-based solution that effectively addresses those challenges.

Problem

Organizations often rely on manual methods such as emails or paper-based requests for software installation. These methods result in delayed approvals, limited request visibility, manual task assignment, and inconsistent communication between employees and the IT support team. As a result, employees experience delays in receiving the software they need to perform their work efficiently.

Solution

The proposed solution automates the complete software installation request lifecycle using ServiceNow Service Catalog and Workflow Editor. Employees can submit software requests through a user-friendly Service Portal, while the system automatically validates inputs, routes requests for approval, generates catalog tasks, sends email notifications, tracks request status, and manages fulfilment until completion.

Purpose

- Solve the software request process by replacing manual operations with an automated ServiceNow workflow.
- Improve user experience through a simple self-service portal, automated approvals, and real-time request tracking.
- Enhance communication by providing automated notifications at every stage of the request lifecycle.
- Increase operational efficiency by automatically assigning catalog tasks to the appropriate IT Software Support Team.
- Improve transparency and trust by allowing employees to monitor the status of their requests from submission to completion.
- Maintain accurate and reliable request information using ServiceNow's REQ, RITM, and SCTASK tables.
- Provide a scalable solution that can be extended to automate additional IT service requests in the future.

Template:

Define CS, fit into CC	1. CUSTOMER SEGMENT(S) CS - Employees requesting company-approved software - Managers approving software requests - IT Software Support Team - ServiceNow Administrators	6. CUSTOMER CONSTRAINTS CC - Lack of request visibility - Manual approval delays - Incomplete request information - Communication gaps - Difficulty tracking request progress	5. AVAILABLE SOLUTIONS AS - Email-based software requests - Phone calls to IT Support - Manual approval process - Spreadsheet-based request tracking - Paper request forms	Explore AS, differentiate
	2. JOBS-TO-BE-DONE / PROBLEMS J&P - Request software quickly and easily - Track request status - Reduce approval delays - Automate task assignment - Eliminate manual request handling - Improve communication between employees and IT	9. PROBLEM ROOT CAUSE RC - Manual software request process - Multiple approval levels - Lack of automation - Manual task assignment - No centralized request tracking - Delayed communication between departments	7. BEHAVIOUR BE - Logs into ServiceNow Portal - Searches for Software Installation Request - Fills required details - Submits request - Tracks request status - Receives completion notification	
Identify, prove TR & EM	3. TRIGGERS TR - Employee requires software for work - New project requires additional software - Existing software needs an upgrade - Company policy requires approved software installation	10. YOUR SOLUTION SL - ServiceNow Service Catalog for software requests - Automated Workflow approvals - Dynamic catalog variables and UI Policies - Automatic Catalog Task creation - Email notifications - REQ, RITM, and SCTASK tracking - Real-time request status updates - Centralized request management through ServiceNow	8. CHANNELS OF BEHAVIOUR CH 8.1 ONLINE - ServiceNow Service Portal - Email Notifications - Workflow Approvals - Service Catalog - Request Status Page	Extract online & offline CH of BE
	4. EMOTIONS: BEFORE / AFTER EM Before: - Frustrated - Confused - Waiting for approvals - Uncertain about request status After: - Satisfied - Confident - Informed through notifications - Happy with faster request processing		8.2 OFFLINE - IT Help Desk - Manager Discussions - IT Support Team - Internal Office Communication
