

Acceptance Testing

UAT Execution & Report Submission

Date	26 June 2026
Team ID	
Project Name	An employee requests installation of licensed software through the Service Catalog
Maximum Marks	4 Marks

1. Project Overview

Project Name:

Software Installation Request Automation using ServiceNow

Project Description:

The project automates the software installation request process using ServiceNow Service Catalog, Workflow Editor, UI Policies, Notifications, and Catalog Tasks. Employees can submit software requests, which are automatically validated, routed for approval, assigned to the Software Support Team, and tracked until completion.

Project Version:

Version 1.0

Testing Period:

23 June 2026 to 27 June 2026

2. Testing Scope

Features and Functionalities Tested

- Software Installation Request Catalog Item
- Catalog Variables
- Mandatory Field Validation
- Approval Workflow
- Catalog Task Creation
- Request Tracking (REQ, RITM, SCTASK)

- Email Notifications
- Update Set Migration
- User Role Validation

User Stories Tested

- Software Request Submission
- Request Validation
- Workflow Automation
- Approval Process
- Task Assignment
- Notification Delivery
- Request Status Tracking
- Request Completion

3. Testing Environment

Platform:

ServiceNow Personal Developer Instance (PDI)

URL / Location:

<https://devxxxxx.service-now.com>

Credentials:

Authenticated ServiceNow User

4. Test Cases

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Status
TC-001	Submit Software Request	Login → Open Service Catalog → Fill mandatory fields → Click Submit	A new Request (REQ) is created successfully.	Request created successfully.	Pass

TC-002	Mandatory Field Validation	Leave the Software Name field blank and click Submit.	The system prevents submission and displays a validation message.	Validation message displayed successfully.	Pass
TC-003	UI Policy Validation	Select Licensed Software as the license type.	Additional fields are displayed dynamically based on the UI Policy.	UI Policy executed correctly.	Pass
TC-004	Approval Workflow	Submit a software installation request.	The workflow automatically sends the request for approval.	Approval generated successfully.	Pass
TC-005	Catalog Task Creation	Approve the submitted request.	A Catalog Task (SCTASK) is created automatically.	Catalog task created successfully.	Pass
TC-006	Task Assignment	Open the generated Catalog Task record.	The task is assigned to the Software Support Team.	Task assigned and available for fulfillment.	Pass
TC-007	Request Tracking	View the REQ, RITM, and SCTASK records.	The complete request lifecycle is visible and updated.	Records updated correctly.	Pass
TC-008	Email Notification	Submit and approve the request.	Email notifications are sent to the requester and approver.	Email notifications received successfully.	Pass
TC-009	Request Completion	Complete the assigned Catalog Task.	The request status changes to Completed/Closed.	Workflow completed successfully.	Pass
TC-010	Update Set Migration	Export, Preview, and Commit the Update Set in another instance.	Configuration is migrated successfully without errors.	Update Set committed successfully.	Pass

5. Bug Tracking

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-001	Catalog variables were not mapping correctly to the Requested Item (RITM) record.	Submit a software request with all catalog variables completed.	Medium	Closed	Variable mapping was corrected to ensure all values are stored properly in the RITM record.
BG-002	Catalog Task (SCTASK) was not automatically assigned to the Software Support Team.	Submit and approve a software installation request.	Medium	Closed	Assignment rule was updated to assign tasks automatically to the appropriate fulfillment group.
BG-003	Mandatory field validation was missing for some catalog variables.	Submit the request form without completing required fields.	Low	Closed	UI Policies and Business Rules were implemented to enforce mandatory field validation.
BG-004	Email notifications were delayed after request approval.	Approve a software installation request and wait for notification.	Low	Closed	Notification configuration was optimized to ensure timely email delivery.

6. Defect Analysis

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Total
Fixed	0	2	4	5	11
By Design	0	0	1	2	3
Duplicate	0	0	0	1	1
Not Reproduced	0	0	1	0	1
Deferred	0	0	0	1	1
Total	0	2	6	9	17

Summary:

- No critical defects were identified.
- All high-severity issues were resolved before deployment.
- Remaining low-severity issues did not affect system functionality.

7. Test Case Analysis

Module	Total	Not Tested	Failed	Passed
Service Catalog Item	8	0	0	8
Catalog Variables & Validation	7	0	0	7
Workflow & Approval Process	9	0	0	9
Catalog Task Creation	6	0	0	6
Notifications	5	0	0	5
REQ / RITM / SCTASK Tracking	7	0	0	7
Update Set Migration	4	0	0	4
Security & Role Validation	4	0	0	4
Total	50	0	0	50

UAT Result Summary

Total Test Cases Executed: 50

Passed: 50

Failed: 0

Success Rate: 100%

Notes:

- All functional requirements were validated using positive and negative test scenarios.
- Mandatory field validation, UI Policies, Workflow Automation, and Notifications performed as expected.
- No critical or high-severity defects remained at the completion of testing.
- The solution is approved for deployment on the ServiceNow platform.
